

# How to Set Up a Microsoft Account

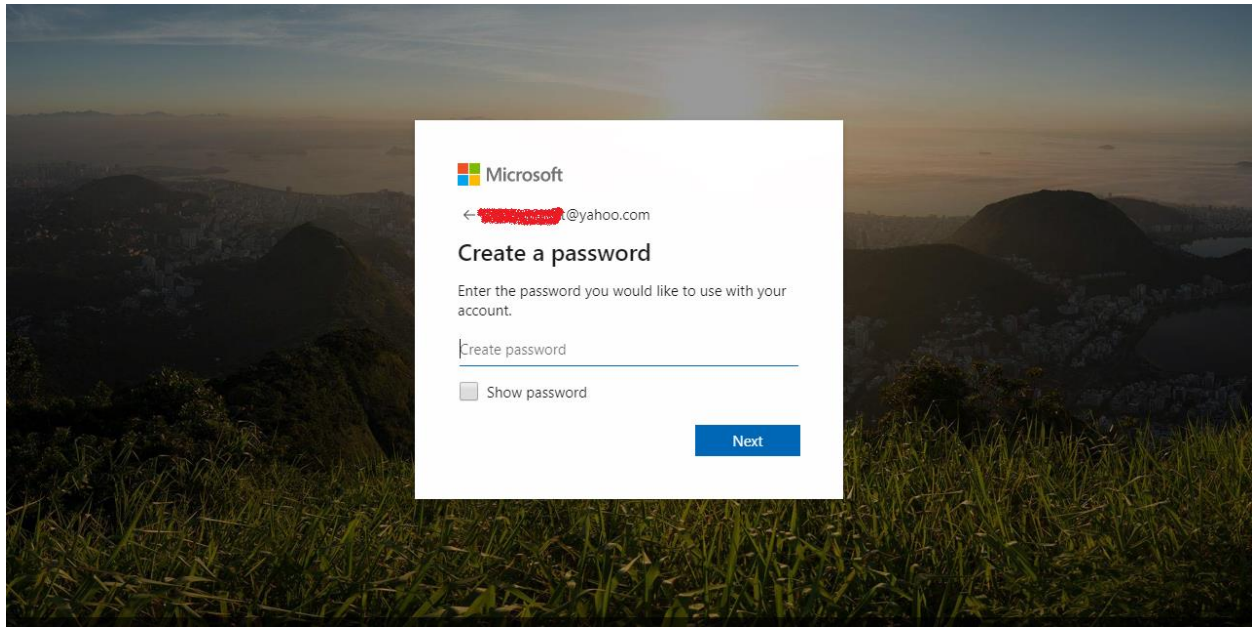

Go to Account.microsoft.com and click on create account

Use an existing email to start an account (can be gmail, yahoo, Hotmail, etc)

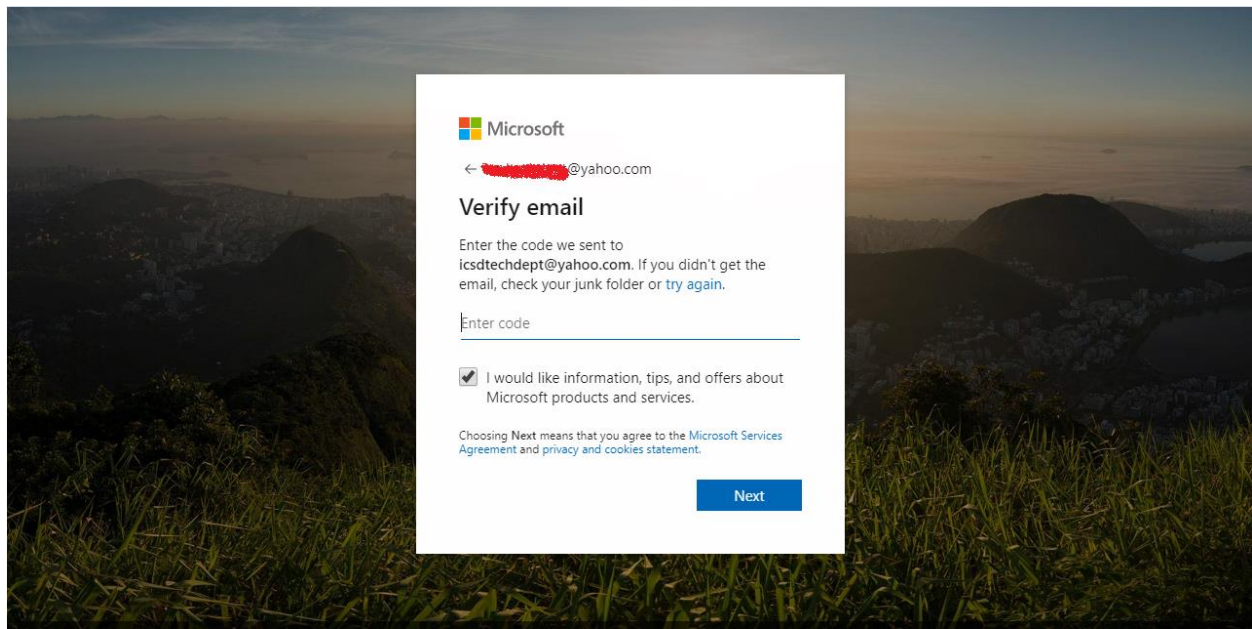

## Create a password for your new account

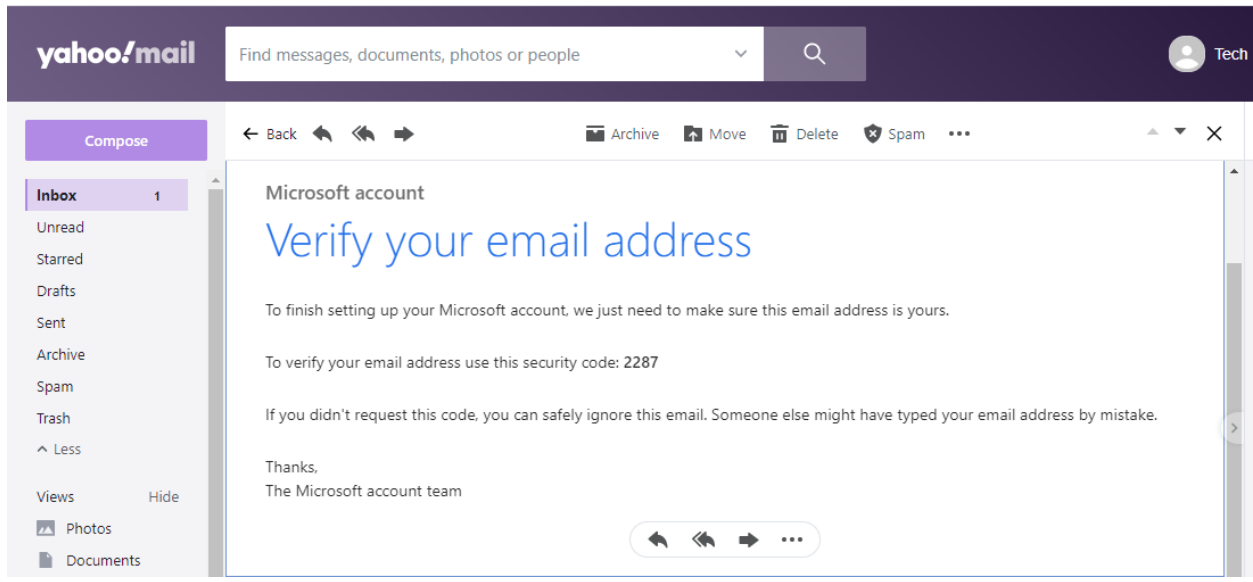

The screenshot shows a Microsoft account creation interface. At the top left is the Microsoft logo. Below it is a back arrow and the email address [redacted]@yahoo.com. The main heading is "Create a password". Below this is the instruction "Enter the password you would like to use with your account." followed by a text input field containing "Create password". There is a "Show password" checkbox which is currently unchecked. A blue "Next" button is located at the bottom right of the form.

## Verify your new account buy checking for a code in your email

The screenshot shows the "Verify email" step of the Microsoft account creation process. It features the Microsoft logo, a back arrow, and the email address [redacted]@yahoo.com. The heading is "Verify email". The instruction reads: "Enter the code we sent to icsdtechdept@yahoo.com. If you didn't get the email, check your junk folder or [try again](#)." Below this is a text input field labeled "Enter code". A checkbox is checked, with the text "I would like information, tips, and offers about Microsoft products and services." Below the checkbox is a small disclaimer: "Choosing Next means that you agree to the Microsoft Services Agreement and privacy and cookies statement." A blue "Next" button is at the bottom right.

## Copy your code and enter it into the Microsoft site

Once you put your code in you should see your account dashboard and now you are done creating your Microsoft account.
