

Tablet Mode

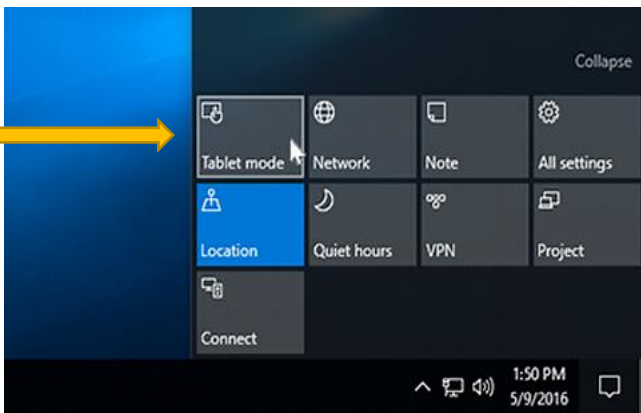

How do I get my laptop's desktop out of tablet mode? (This procedure is for the Desktop view only)

Tablet Mode is "On"

On

Off

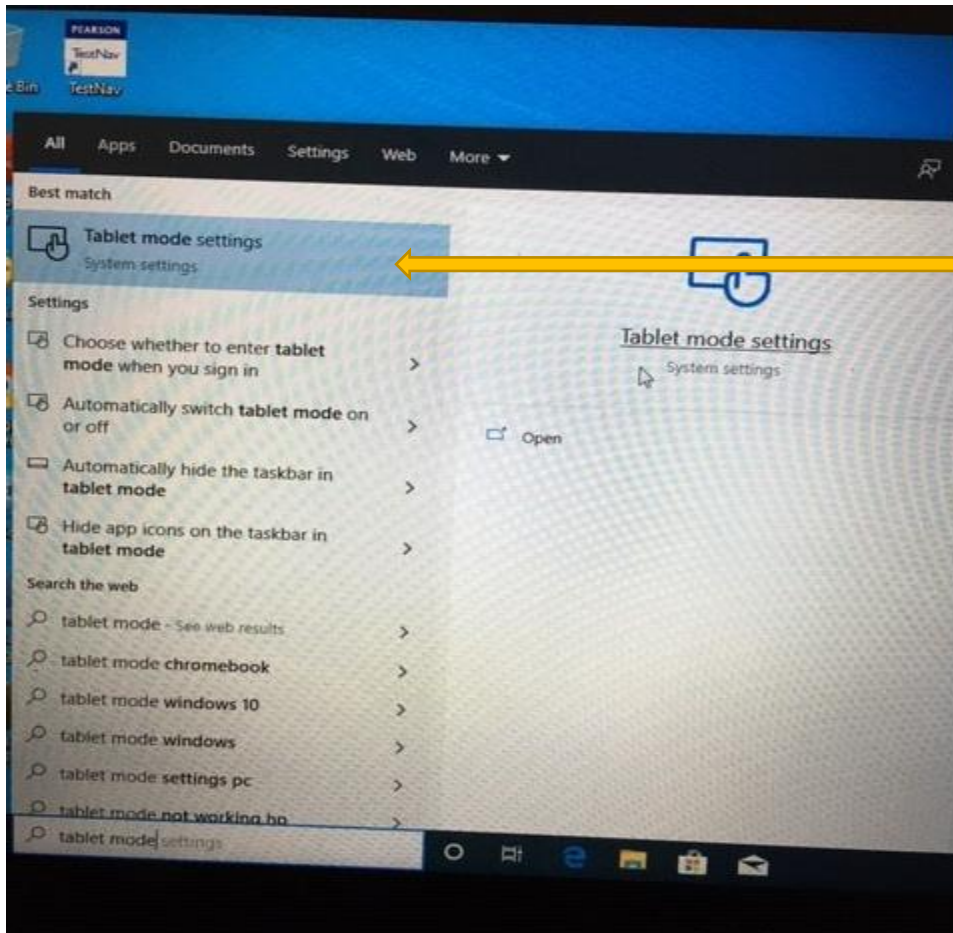

1. Click on the notification symbol (lower right)
2. Click on tablet mode to turn on or off. Blue is On Grey is Off

What if my laptop won't exit tablet mode? (This is to use your laptop as a Tablet)

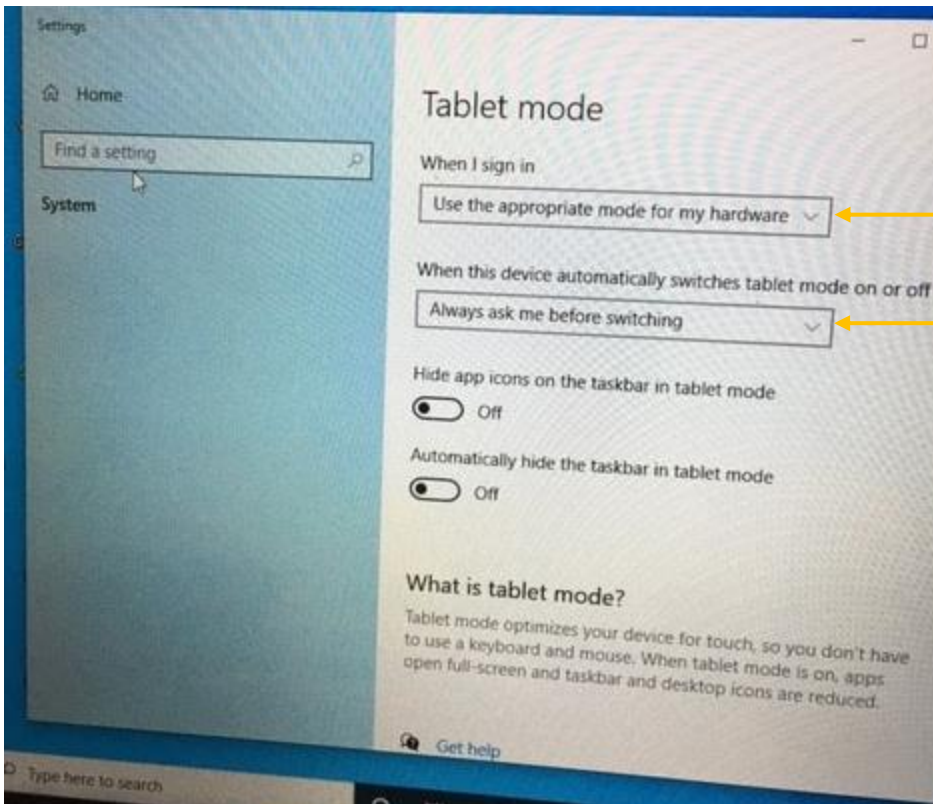

First try opening your laptop all the way, wait 3 seconds, then slowly close it back to the laptop/desktop position, but do not close it all the way.

If you get "Do You Want to Exit Tablet Mode" in the lower right corner, click yes and it should exit tablet mode.

If not, try the following:

1. Type "Tablet mode" in the search box and hit enter or click on Tablet mode settings.

Select the following options as shown in the boxes using the drop down arrows

2. You should see the screen above

3. Close(exit) the Tablet mode window.

Another way to configure your laptop switch between Desktop and Tablet Mode?

Open your laptop all the way and when the box below appears in the bottom right, use the drop down arrow to change to "Always ask me before switching" then click "yes"
